

~~SECRET~~

CENTRAL INTELLIGENCE AGENCY
WASHINGTON D. C.

17 MAY 1959 RETURN TO CIA
Background Use Only
Do Not Reproduce

TO: Commissioner of Narcotics
FDNY: Deputy Director, Plans
SUBJECT: Clinton Corcoran Carroll - Identity
in Doubt

1. Through his relationship with the
USIS Agency has learned of a possible USO-Intelligence Oper-
ation's narcotics activity in Europe as well as the Chinese Communist
Redcross in Paris, Switzerland. For over two years [redacted] has been running
a couple of agents in contact with personnel in the Chinese Communist
Redcross in Bern. Until February 1967, this agent reported no contact
with narcotics activity; however, in February he allegedly was informed
by his Chinese contacts that he secretly would be handling the Chinese
Communist narcotics business in Geneva, Switzerland. He contact repre-
sently informed him that Hamburg handles the narcotics (opium, morphine,
and cocaine were mentioned) traffic to the United States, while Geneva,
Switzerland handles traffic to the Free State and South Africa.

2. On 31 March, 1957, the agent advised that his colleague expected from the Paris Embassy. He stated he was informed that he would be taking over the handling of Comintern Communist activities relative to one ring operating in France, one in Italy, one in Spain, and the one in Germany. He would be the contact man between the ring leaders and the Paris Embassy, and in this capacity he would have an Embassy service as diplomatic car and an illegal Will and Commodity Service passport at his disposal.

3. While in Switzerland, the agent claimed to have been taken to a tavern near the railroad station at Lausanne where he met two Frenchmen named Jean and Pierre (about 22-23 years old), who apparently were connected with the French ring. The man working the agent reportedly was interviewed at the "Club 38" in Geneva by a certain Gabrilli, who asked for Mr. C., et al and for the agent's companion (agent's attempt to Malone terrorist First Secretary). The implication was left that Gabrilli headed the Italian ring.

The next night, also at the "Club 50," Gatralli handed to the agent's companion a package of money containing a number of 1000 Swiss franc notes. It was the agent's impression that his companion had given Gatralli assurance that the 100% of opium prepared the night before would be delivered. Two nights later another meeting with Gatralli was held in the same place. On the next night in "Club 50" the agent and his companion met two Spaniards whom names the agent does not recall. The Spaniards told the agent's companion that they did not need anything because they still had a supply on hand.

4. According to the agent, there are three groups of dealers in narcotics in contact with the Chinese Embassy at Bern: (a) the French group at Lausanne, (b) the Italian group at Geneva, and (c) the Spanish group at Zurich. Also, according to the agent, the French and Spanish groups operate in South France and send their narcotics to America via Marseilles. The Italian group as far as possible deals in narcotics in Italy and also exports to the south, probably to North Africa. The group in Hamburg apparently had experienced difficulties in their traffic and therefore at least for the present have put their work aside.

5. The agent stated that he had seen at least 10 wooden boxes of opium in the cellar of the Chinese Embassy building at Zehneggweg in Bern. In each box a brownish compact mass of opium was expressed to about 50 K.G. per box, which boxes have the same dimensions as an 18-liter can and measure about 30x30x30 cm. Each box had a round hole in the top and a strong steel seal. In his opinion the boxes would be transported by car from the Chinese Embassy to a prearranged location and then transferred from the first to a second car. //

6. [The Luxembourg agency] has also informed this Agency that a Luxembourger was recently approached by a French national to join a ring which was receiving opium in large amounts from the Chinese Communists to be smuggled to the United States. The Luxembourger expressed his willingness to follow this up if he could have the direction of the Americans. [The Luxembourg agency] is willing through our representative in Luxembourg, to put your representative in contact with the Luxembourger for whatever use you may want to make of him. //

7. The [redacted] has also informed this Agency that they are willing to turn over their agent to this Agency for future handling, as his activities are no longer of immediate interest to [redacted] security. Although this Agency has serious

reservations about the reliability of the [redacted] agent and his story of Chinese Communist narcotics activity, and although this Agency would not normally be interested in taking over the case, if your Bureau has sufficient interest in the case matter, this Agency would be willing to approach the [redacted] in arranging a transfer of the agent to a field agent of your Bureau.

8. In indication at your earliest convenience of your Bureau's interest in this matter and advise as to this Agency's course of action would be very much appreciated.
